

EDUCATION

the Hong Kong University of Science and Technology (Guangzhou)
Mphil (AI Thrust) | Advisor: Prof. Chengwei Qin and Prof. Renjing Xu

Sep. 2025 - Jun. 2027

Xiamen University

B.Econ. in **Finance**, IUEC (Average Score: 87.53/100 Rank: 7/40, Taught in English)
B.Sc. in **Statistics**, WISE (the Second Degree, Taught in English)

Sep. 2021 - Jun. 2025

PUBLICATIONS

LumiBench: Benchmarking Illumination Robustness in Robotic Manipulation Policies

Yiman Pang, Haoming Gu, Wenjie Zhang, **Yu Yan**, Xiangy Chen, Mingqian Zhou, Zhengtu Liang, Boyang Cai, Tao Wang, & Renjing Xu.

ICRA 2027 Conference Submission

Contribution: Data collection for *3 real-robot tasks*; Process *5 policies* in the RoboTwin simulation system; Drew figures for the paper.

Deep Search in Real-World Web Environments

Xiaomin Yu, Hongliang Chen, Zhe Huang, Shilin Yan, Shao-Rong Su, Xuqiao Ma, Jiwei Fang, Jiayu Chen, Feiyang Wang, **Yu Yan**, Yini Huang, Ruoxi Cheng, Chen Chen, Yuhui Zhang, Chen Liu, Jianbo Lin, Yijiang Li, Xiaobin Hu, Zhuoran Lu, Zhongqi Yue, Weishi Wang, & Chengwei Qin.

ICLR 2027 Conference Submission

Contribution: Designed *50 multimodal multi-hop questions* for the benchmark; Handled dataset cleaning and human check.

Unified-MAS: Universally Generating Domain-Specific Nodes for Empowering Automatic Multi-Agent Systems

Hehai Lin, **Yu Yan**, Zixuan Wang, Bo Xu, Sudong Wang, WeiQuan Huang, Ruochen Zhao, Minzhi Li, & Chengwei Qin.

EMNLP 2026 Conference

Contribution: Ran DeepFund on real-world market data to collect *agent trajectory datasets*; Benchmarked *4 automatic multi-agent systems* (MAS-Zero, AFlow, ScoreFlow, MAS²) on *4 benchmarks* (TravelPlanner, HealthBench, J1Bench, DeepFund); drew figures for the paper.

RESEARCH EXPERIENCE

Humanoid Computing Lab (HCLab)

Guangdong, China

RESEARCH ASSISTANT | ADVISOR: **PROF. RENJING XU**

Dec. 2025 – Present

• **The First Prize in ICRA 2026 WBCD (Vienna, Austria) Competition Track 4 Deformable Manipulation**

Introduction: The competition features real-world industrial *deformable manipulation* tasks, utilizing ARX robotic arms to tackle challenges like *T-shirt flattening*.

Method: Our framework fine-tunes π_0 -five using *1k / 10h* expert demonstrations at *45Hz*, integrating *Heuristic DAgger* for robust recovery. Deploying *5* inference steps with *exponential action-chunk smoothing* achieves a *90%+* success rate within *20s*.

Contribution: Data collection for the *dual-arm T-shirt flattening* task, model training and fine-tuning for π_0 -five.

Paradoox AI

Guangdong, China

RESEARCH ASSISTANT | @LAI LAB | ADVISOR: **PROF. CHENGWEI QIN AND PROF. YUYU LUO**

Mar 2026 - present

• **InfoKnight: Proactively Forecasting Error Gaps for Online Blocking in Autonomous Agent Tool-Use**

Introduction: Evaluation, interpretability, and trustworthy AI: exploring the capability boundaries of LLM in the financial domain.

Contribution: By developing a proactive, small-model-guided *Contextual Bandit framework*, the model secures financial AI agents against *data-retrieval attacks* by evaluating the 'Error Gap' between predicted and actual tool outputs prior to execution.

Xiamen University

Fujian, China

RESEARCH ASSISTANT | ADVISORS: **PROF. CHENDI WANG**

Mar 2025 - Jun 2025

• **TCAD: A Real-Time Framework for Stock Market Manipulation Detection Based on Deep Learning**

Introduction: Market Manipulation, Anomaly Detection, FinTech, Unsupervised Deep Learning.

Contribution: By integrating the *Transformer* architecture with *parallel CNNs* to construct the TCAD framework, the model effectively captures both long-term dependencies and multi-scale local features within stock time-series data.

Quantecon

Fujian, China

RESEARCH ASSISTANT | ADVISORS: **PROF. THOMAS SARGENT (NOBEL LAUREATE IN ECONOMICS)**

Oct 2024 - Aug 2025

- Collaborated on building **QuantEcon**, an open-source platform for economic modeling and computational code sharing.
- Supervised by **Matthew McKay** (Chief Developer, Australian National University).
- Developed *parsing mechanisms* to isolate natural language text, enabling lossless extraction and restoration of mixed content containing complex Jupyter Notebook structures, Markdown syntax, and LaTeX mathematical formulas.
- Assisted in *building a large model-driven translation pipeline* to replace traditional machine translation, enabling high-fidelity Chinese-English conversion of lecture notes.

WORK EXPERIENCE

DeepWisdom

META GPT TEAM | PRODUCT OPERATION-AI AGENTS FOCUS

• Product Competitor Analysis:

Introduction: Conducted in-depth analysis of over ten AI coding tools (such as Cursor, GitHub Copilot, Manus, Perplexity).

Result: Raised community engagement by 30%, maintaining MGX’s top position on the Product Hunt weekly leaderboard.

• User Operation and Work Order Management:

Introduction: Combined with the work order data of MGX-BUG-Report, a 24 - hour response SOP for user demand feedback was formed and incorporated into the company’s overall product operation process.

Fujian, China

Mar 2025 - Jun 2025

People’s Bank of China

CREDIT REVIEW

• Credit Reporting Consultation

GF Securities

EQUITY CAPITAL MARKETS (ECM)

• Roadshow Preparation: Equity structure analysis and financial competitiveness evaluation. In-depth research on the wire and cable industry.

• Report Drafting, Interview Coordination: Report Drafting-Assisted in due diligence for IPO and refinancing projects.

Henan, China

Mar 2025 – Mar 2025

Guangdong, China

Jan 2025 – Feb 2025

EXTRACURRICULAR ACTIVITIES

2026	First Place, ICRA 2026 What Bimanuals Can Do (WBCD) Challenge	Vienna, Austria
2024	National First Prize, 18th “Challenge Cup” Competition	Fujian, China
2024	Provincial Award, Innovation and Entrepreneurial Training Program	Fujian, China
2023	Provincial Third Prize, 2023 National Collegiate Mathematical Contest in Modeling	Fujian, China

SKILLS

English Proficiency	CET-6: 601; IELTS: 6.5
Technology Skills	Python, R, MATLAB
